SUMMARY

Product-focused Full-Stack Engineer with 8+ years of experience building and launching products across healthcare, fintech, and enterprise software. Experienced in product discovery, user research, requirements definition, prioritization, product analytics, and cross-functional execution, backed by a strong software engineering background and hands-on experience with AI-enabled products and workflows.

WORK EXPERIENCE

Senior Full-Stack Engineer | Mochi Health, San Francisco **DEC 2024 - APR 2026**

- Led engineering for Clinical Operations and contributed to product discovery, improving onboarding, search, and core workflows used by nearly 1,000 providers supporting care for 200K+ patients.
- Owned the product and engineering partnership with Insurance to build a credentialing system, improving speed and data consistency while migrating hundreds of thousands of records.
- Built and launched the Collaborating Physicians product, enabling physicians to supervise multiple NPs and expanding care capacity across hundreds of providers in the U.S.
- Introduced PostHog, FullStory, and Cohere to analyze usage and user pain points, supporting data-driven product decisions and A/B testing.

Senior Full-Stack Engineer | Pulley, San Francisco **DEC 2020 - OCT 2024**

- Owned the Communications Hub from concept through launch, replacing email-based workflows with investor updates connected to company data for more consistent and transparent communication.
- Led frontend development of the Valuation Platform, streamlining analyst workflows to reduce turnaround from days to about 2 hours and enabling 1,800+ valuations in its first year.
- Built V1 of the Offer Letter Builder as the sole engineer, partnering with product and design from scoping through launch; it became a widely used product with thousands of offer letters sent.
- Helped shape multiple 0-to-1 products, working closely with product and design from early scoping through launch and iteration.

Software Engineer | Zoho Corporation, India **MAY 2017 - DEC 2020**

- Helped take a no-code website-development product from whiteboard concept to working V0, leading a team of 4-5 engineers and helping accelerate website-development workflows.
- Built an interactive graph visualization library for an internal research product, developing custom layout and collision algorithms optimized to handle 7,000+ nodes.

EDUCATION

Bachelor of Technology in Software Engineering | SRMIST, Chennai, India **Graduated: 2017**

SKILLS

Product Management: Discovery, User Research, Requirements, Prioritization, Roadmapping, Strategy, Analytics, Prototyping, Stakeholder Management, Cross-Functional Collaboration, 0-to-1 Development

Applied AI: AI Agents, RAG, LLM APIs, Tool Calling, Function Calling, Harness Engineering, Claude, Codex, Grok

Engineering: JavaScript, TypeScript, Python, Go, Node.js, React, Next.js, PostgreSQL, GraphQL, Redis, AWS, Docker
